Art Unit: 3753

This office action is responsive to communications filed 01/16/2007.

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01/16/2007 has been entered.

Claims 1 – 28, 30, and 32 – 33 are pending.

Applicant's claim to domestic priority under 35 U.S.C. 119(e) has been noted.

2. This application contains claims 10 and 21 drawn to an invention nonelected with traverse in the communication filed 12/14/2005. Claims 10 and 21 remain withdrawn for further consideration as being drawn to a non-elected species.

3. **Claims 1 – 9, 11 – 20, 22 – 28, 30 and 32 – 33 remain for further consideration.**

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3753

4. Claims 1 – 7, 11 – 20 and 22 – 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Noll et al. (US 6,581,626).

The applied reference has a common assignee and inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

The '626 patent to Noll et al. discloses a modular casing or a check valve arrangement that comprises a housing having an inlet end (17) and an outlet end (19) defining a flow channel therebetween formed by sidewalls and a bottom wall of the housing, a modular cage (45, 55) removably secured to said housing, the modular cage having an interior cavity wherein at least one check valve assembly is removably placed. A fluid seal each (67) in the form of a gasket is positioned at the two ends of the modular cage for sealing the cage within the flow channel the housing. The modular cage shows a lip (near (355), See Fig. 8). It is noted that the arrangement disclosed in '626 patent necessarily performs the method recited in claim 25 in its usual and normal operation.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3753

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 8, 9 and 22 - 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noll et al. (US 6,581,626) as applied to claims 1 – 7, 11 – 20 and 22 – 25 above, and further in view of WO 00/70246.

The '626 patent to Noll et al. discloses the claimed invention with the exception of explicitly disclosing the fastening means between the modular casing and the housing.

The document WO'246 discloses a modular fluid casing wherein a lug (78) extends outwardly from said housing, the lug defining an orifice (85) adapted to receive a fastener (90). The modular cage defines at least one protrusion (86) having a slot (88) aligned with said orifice of said lug whereby the fastener (90) passes through the slot and the orifice for the purpose of reliably securing said modular cage to the housing.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided in Noll'626 and arrangement of fastening as

Art Unit: 3753

disclosed in the document WO'246 for the purpose of reliably securing said modular cage to the housing.

8. Claims 26, 27, 28, 30 and 32 are allowed.

9. Claim 33 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

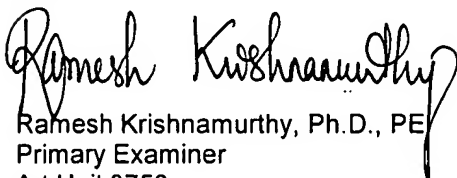

Response to Arguments

11. Applicant's arguments filed 11/15/2006 have been fully considered but they are moot in view of the new grounds of rejection set forth above.
